Plant and Soil **170**: 385–388, 1995.

Contents Volume 170 (1995)

THE SIGNIFICANCE AND REGULATION OF SOIL BIODIVERSITY

SELECTED PAPERS FROM THE PROCEEDINGS OF THE INTERNATIONAL SYMPOSIUM ON SOIL BIODIVERSITY

May 3–6, 1993, Michigan State University, East Lansing, Michigan, USA

Guest Editors: H.P. COLLINS, G.P. ROBERTSON and M.J. KLUG

Preface 1–2

BIODIVERSITY AND ECOSYSTEM PROCESSES

A hierarchical approach to evaluating the significance of soil biodiversity to biogeochemical cycling 5–22
M.H. Beare, D.C. Coleman, D.A. Crossley Jr., P.F. Hendrix, E.P. Odum

Mutualism and biodiversity in soils 23–33
P. Lavelle, C. Lattaud, D. Trigo, I. Barois

The detritus food-web and the diversity of soil fauna as indicators of disturbance regimes in agro-ecosystems 35–43
D.A. Wardle, G.W. Yeates, R.N. Watson, K.S. Nicholson

MICROBIAL POPULATION DYNAMICS

Patterns and regulation of mycorrhizal plant and fungal diversity 47–62
E.B. Allen, M.F. Allen, D.J. Helm, J.M. Trappe, R. Molina, E. Rincon

Thoughts on the processes that maintain local species diversity of ectomycorrhizal fungi 63–73
T.D. Bruns

Soil microbial diversity and the sustainability of agricultural soils 75–86
A.C. Kennedy, K.L. Smith

The functional significance of the microbial biomass in organic and conventionally managed soils 87–97
M.M. Wander, D.S. Hedrick, D. Kaufman, S.J. Traina, B.R. Stinner, S.R. Kehrmeyer, D.C. White

Fatty acid methyl ester (FAME) profiles as measures of soil microbial community structure 99–113
M.A. Cavigelli, G.P. Robertson, M.J. Klug

Discrimination of microbial diversity by fatty acid profiles of phospholipids and lipopolysaccharides in differently cultivated soils 115–122
L. Zelles, R. Rackwitz, Q.Y. Bai, T. Beck, F. Beese

Effects of previous intensive agricultural management on microorganisms and the biodiversity of soil fauna 123–129
J. Filser, H. Fromm, R.F. Nagel, K. Winter

Divergence of mycorrhizal fungal communities in crop production systems 131–140
J.W. Hendrix, B.Z. Guo, Z.-Q. An

The role of glutamine synthetase in regulation of nitrogen metabolism within the soil microbial community 141–147
G.W. McCarty

Decomposition and nitrogen release from leaves of three hardwood species grown under elevated O_3 and/or CO_2 149–157
R.E.J. Boerner, J. Rebbeck

Interpreting soil ciliate biodiversity 159–164
S.S. Bamforth

SOIL FAUNAL RELATIONSHIPS

Measures of nematode community structure and sources of variability among and within agricultural fields 167–181
D.A. Neher, S.L. Peck, J.O. Rawlings, C.L. Campbell

Relationships among microarthropods, fungi, and their environment 183–197
J.N. Klironomos, B. Kendrick

Population dynamics and functional roles of Enchytraeidae (Oligochaeta) in hardwood forest and agricultural ecosystems 199–207
P.C.J. van Vliet, M.H. Beare, D.C. Coleman

How do earthworms affect microfloral and faunal community diversity? 209–231
G.G. Brown

Earthworm community structure and diversity in experimental agricultural watersheds in Northeastern Ohio 233–239
P.J. Bohlen, W.M. Edwards, C.A. Edwards

Research articles

Competition for ammonium between plant roots and nitrifying and heterotrophic bacteria and the effects of protozoan grazing 241–250
F.J.M. Verhagen, H.J. Laanbroek, J.W. Woldendorp

Root and leaf attributes accounting for the performance of fast- and slow-growing grasses at different nutrient supply 251–265
P. Ryser, H. Lambers

Effects of enhanced atmospheric CO_2 and nutrient supply on the quality and subsequent decomposition of fine roots of *Betula pendula* Roth. and *Picea sitchensis* (Bong.) Carr. 267–277
M.F. Cotrufo, P. Ineson

Reaction of incompatible isolate of *Pyricularia grisea* on rice leaves stripped of epicuticular wax reflects blast conduciveness of soils 279–286
U.S. Singh, R.S. Zeigler, J.M. Bonman

Temporal changes in soil microbial biomass carbon in an arable soil and consequences for soil sampling 287–295
E.-A. Kaiser, R. Martens, O. Heinemeyer

Root length dynamics in agroforestry with *Gliricidia sepium* as compared to sole cropping in the semi-deciduous rainforest zone of West Africa 297–306
G. Schroth, W. Zech

Methane emission from a wetland rice field as affected by salinity 307–313
H.A.C. Denier van der Gon, H.-U. Neue

Radiocaesium in an organic soil and the effect of treatment with the fungicide 'Captan' 315–322
C.A. Shand, M.V. Cheshire, S. Smith, C.D. Campbell, P. Anderson, C.M. Davidson, D. Littlejohn, N. Jamieson

Interaction between the root-lesion nematode *Pratylenchus vulnus* and the mycorrhizal association of *Glomus intraradices* and Santa Lucia 64 cherry rootstock 323–329
J. Pinochet, C. Calvet, A. Camprubi, C. Fernández

Response of irrigated mulberry (*Morus alba* L.) to VA-mycorrhizal inoculation under graded doses of phosphorus 331–337
R.S. Katiyar, P.K. Das, P.C. Choudhury, A. Ghosh, G.B. Singh, R.K. Datta

The significance of antibiotic production by *Pseudomonas aureofaciens* PA147-2 for biological control of *Phytophthora megasperma* root rot of asparagus 339–344
F.L. Carruthers, T. Shum-Thomas, A.J. Conner, H.K. Mahanty

Loss of exudates from the roots of perennial ryegrass inoculated with a range of micro-organisms 345–349
A.A. Meharg, K. Killham

Symbiotic effectiveness of *Rhizobium meliloti* of low root temperature 351–358
W.A. Rice, P.E. Olsen, M.M. Collins

Effects of timing and supply of nitrogen on nitrogen remobilization from vegetative organs and redistribution to developing seeds of sunflower 359–370
P.J. Hocking, B.T. Steer

Expression of *Frankia nif* genes in nodules of *Alnus glutinosa* 371–376
K. Pawlowski, A.D.L. Akkermans, Ab van Kammen, T. Bisseling

Short Communication

Leaf development and phenology of *Triticum eastivum* and *T. durum* under different moisture regimes 377–381
M.G. Mosaad, G. Ortiz-Ferrara, V. Mahalakshmi, J. Hamblin

Announcements 383–384

Contents volume 170 (1995) 385–387

Author index 388

Instructions to authors (1995) 389–391
